

**Specialist  
in industrial  
parts  
finishing  
work**

**MC  
Coating**

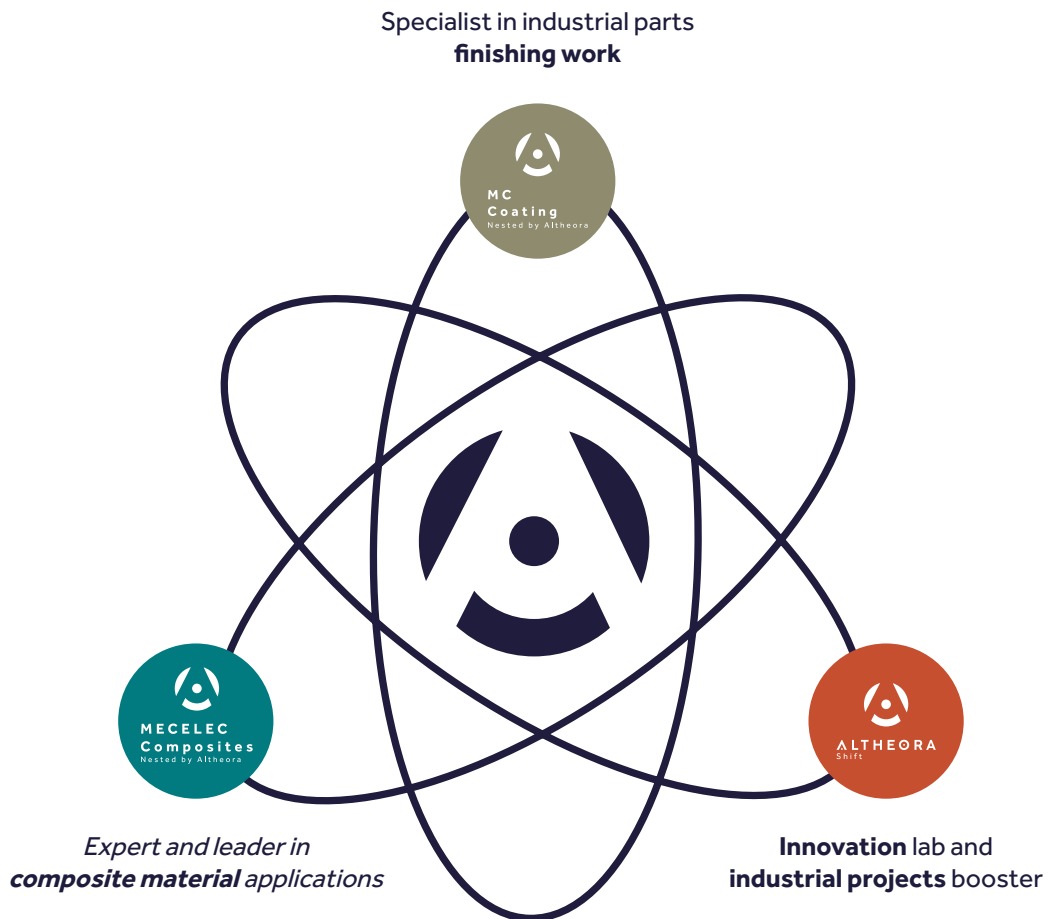

Nested by Altheora

# ALTHEORA group

## ALTHEORA is the French leader in composite material applications.

Since 1934, the company has been known for its specific tools development in construction and public works (boxes for electrical, gas, telecommunications, and other applications). The Group has developed **expertise** and **state-of-the-art technologies** in wide-ranging and exacting sectors such as railways, aeronautics, ground mobility, healthcare, leisure, urban outdoor furnishings, and more. ALTHEORA offers **solutions that are 100% integrated**, starting from R&D to production. Alongside its clients, it develops new products responding to **the needs of tomorrow** (new types of mobility, smart cities, etc.).

The Group is built around three centers of excellence:

# MC Coating

## specialist in industrial parts finishing work

### Specialist in industrial parts finishing work

Within the ALTHEORA Coating division, **MC Coating is the industrial painting and coating specialist.** Its experts develop technological skills in liquid and powdered painting.

Its **R&D** team develops custom formulas for maximum long-term products' protection, even in extreme environments. It constantly sources new types of paint improving the parts' performance.

The combination of MC Coating's skills, cutting-edge technical expertise and manufacturing solutions help **to increase productivity, reduce costs and improve the finished parts' quality**, whatever the type of part is, or the clients' application requirements are.

## high performance production and control facilities

**MC Coating's new production unit extends over 3000 m<sup>2</sup> and meets the highest quality standards both in terms of production and logistics.** Equipped with temperature-controlled workshops and storage, conveyor lines with strict hygrometric controls, a test lab for thickness, adhesion and colorimetry and efficient intralogistics, **MC Coating asserts its position as the specialist in industrial parts finishing work.**

- Paint preparation lab
- Conveyor lines liquid application\*
- Conveyor lines powder application
- Painting area for small/medium quantities
- Sandblasting
- Specific finishing area (sanding, masking)

\*(painting booths, desolvation chamber and ovens)

## high performance production and control facilities

MC Coating masters complex paint application processes: fireproof, extreme temperatures proof, electrical insulator, stealth, waterproof or anti-bacteriological, for many sectors.

Aeronautics

Medical sector

Railway industry

Urbanism

Ground mobility

# our achievements

## GENERAL ELECTRIC

General Electric entrusted MC Coating with the finishing of a medical mammography device. The extremely precise liquid paint application is a key factor in the part's high-end finishing.

Production: medium quantities

## NAVAL GROUP

Meeting the most demanding military and marine specifications, MC Coating took over the heavy torpedo F21 "Artémis" coating, French torpedo made by Naval Group, for neutralization of underwater or surface targets.

Production: medium quantities

## AGCO

MC Coating paints composites motor hoods, and thermoplastic fenders, available on Valtra tractors.

Production: medium quantities

## TRIGANO

MC Coating also paints the front roof of the iconic CHALLENGER and CHAUSSON Motorhomes. These roofs are made of SMC, and manufactured at the Mauves site. (MECELEC Plant).

Production: large quantities
